SKILLS

- HTML
- CSS
- JavaScript
- React
- C++
- OOP
- DBMS
- Software Engineer

EDUCATION

Bachelor of Science in Computer Science

KEY PROJECTS

Interactive Weather Application

Developed a dynamic weather application utilizing HTML, CSS, and JavaScript with real-time API integration. Features include location-based weather data retrieval, comprehensive error handling for invalid inputs, and mobile-responsive design for optimal user experience across devices.

Personal Portfolio Website

Drafted a professional portfolio website using React, JavaScript, and Tailwind CSS. Implemented dynamic routing with React Router, created reusable components for scalability, and utilized Tailwind CSS for consistent styling and responsive design across all screen sizes.

Travel & Tourism Platform

Built a comprehensive travel website using React, HTML, CSS, and JavaScript. Featured destination galleries with detailed information, modular component architecture, and intuitive navigation system. Focused on user experience with smooth transitions and engaging visual elements.

GitHub Profile Analytics Tool

Created a GitHub profile viewer application using React, JavaScript, and Tailwind CSS. Integrated GitHub REST API for fetching user data, repositories, and follower information. Implemented advanced search capabilities and responsive design with clean, modern UI components.
